

## HOW TO MEASURE AND HEADSTALL SIZES

Measure 1 ½" to 2" up from the corner of the horse's mouth. From that point, measure the circumference of the horse's nose. From that same point (1 ½" – 2" up from the corner of the horse's mouth). Run your tape measure up the side of the face, around the poll (behind the ears) to the same point on the other side of the face.

\* If you find it too cumbersome to run your tape all the way around the head, measure to the very top of the poll (to the point right between the ears) and double that measurement)

Use these two measurements to determine what size headstall your horse needs.
